

# HULL & ANODE INSPECTION

3D models of hull and anode

## Project

Demonstration survey of hull and anode inspection

## Vessels / ROVs

Janus II / APACHE

## Date

September 2016

## Project type

Hull & Anode Inspection Survey

## Location

France

## Scope Overview

Ship owners need better quality control for hull inspection to preserve the safety and production of their assets, especially on FPSOs and tankers.

In order to demonstrate the ORUS3D capabilities, COMEX carried out a trial survey on its vessel; confirming the system performance and relevance for this type of applications.

## Survey

2:00 hours

## Processing duration

6:00 hours

## 3D Models' Accuracy

+/- 0.5 mm

Anode measurement
