

MONITORING OF RED CORAL POPULATIONS

3D models of Coral Reef

Client

Project

Red Coral

Vessels / ROVs

Janus II / APACHE

Date

February 2019

Project type

Monitoring of red coral populations

Location

France

Water Depth

50 – 350 m

Scope Overview

Within the scope of monitoring red coral (*Corallium rubrum*) populations in the French *Calanques* National Park (off Marseille coast), COMEX Marine and Innovation Departments carried out underwater surveys beyond 50 meters depth, using an ROV equipped with ORUS3D system.

Survey

00:20 per colony

Processing duration

3:00 per colony

3D Models' Accuracy

+/- 0.5 mm
