

Emergency medical suitcase

Ref: Please contact us for further information

Description of the equipment:

Recommended for emergency services specialized in first aid, the emergency medical suitcase is designed to carry a maximum 3L oxygen cylinder.

The interior is fully adaptable to the rescuer's needs, thanks to the 4 removable compartments with Velcro, each with a transparent front and differentiated by standardized color coding (blue: respiratory system, red: circulatory system, green: various surgical equipment, yellow: pediatric equipment).

For examination purposes, it includes a blood pressure monitor, stethoscope, otoscope, and pulse oximeter. For oxygen therapy, it contains a 3-liter oxygen cylinder, resuscitator, and Guedel airway tubes. It also comes with a first aid cabinet kit equipped with the necessary materials for treating, disinfecting, dressing, and protecting a victim, including a survival blanket.

The emergency medical suitcase is easily portable thanks to its retractable handle. The user can also carry their oxygen therapy equipment in a backpack.

Key features:

- Reflective bands for day and night visibility
- 2 zones, oxygen therapy space and space with removable compartments
- External transparent pocket on the front part for documents
- 3 large transparent zippered pockets in the oxygen therapy space
- 4 removable compartments and 1 insulated ampoule holder
