

Hyperbaric seating module

Ref : contact us for further information

Description of the equipment:

The chairs are assembled in modules of 1, 2, 3, or 4 on a support equipped with swivel casters with brakes. Each module is equipped with a quick locking system in position when inside the treatment chamber.

Ergonomic and robust, each COMEX chair meets specific demands to ensure comfort during hyperbaric oxygen therapy sessions. In addition to being ergonomic, it is ideally suited for individuals with a larger build or for intensive use.

The seat and backrest are filled with high-resilience foam, covered with ultra-resistant, fire-retardant fabric (M1 classification), and decontaminable. A wide range of colors is available.

Each chair is equipped with 4D adjustable armrests (height, depth, width, and rotation). A specific system ensures lumbar support. The padded seat can support up to 150kg. The headrest is adjustable in height for added comfort.

Main features:

- Footrest
- Armrests that pivot on 4 axes (height, depth, width, and rotation)
- Adjustable headrest in height
- Reclining backrest
- Adjustable lumbar support
- M1 classification (fire-retardant)
- Available in various colors
