

Disposable Resuscitator

Ref : CX 1929

Description of the equipment:

The Disposable Resuscitator with Unidirectional Valve allows for the delivery of oxygen (up to 100%) to an occupant in a hyperbaric environment (single-use).

The Disposable resuscitator developed by COMEX allows for connection to the gas evacuation system to maintain an acceptable oxygen concentration in the chambers.

The Disposable resuscitator is for single-use only.

The SafeGrip™ texture of the balloon ensures a secure grip in emergency environments.

The ergonomic design of the balloon ensures optimal grip during continuous ventilation. The integrated handle provides user comfort and ensures consistent compressions.

Main features:

- *Volume per single-handed compression: 600 ml*
- *Volume per two-handed compression: 1000 ml*
- *Resuscitator volume: 1475 ml*
- *Dimensions (length x diameter): 295 x 127 mm*
- *Weight (with mask and reservoir): 314 g*
- *Reservoir balloon volume: 2600 ml*
